A number of answers are being received in the office of the Superintendent of Public Instruction to his recent letters to superintendents in other Bouthern States asking co-operation in an effort to induce the trustees of the Peabody fund to divide the fund among the States entitled to it rather than concentrate it in a great normal college for teachers, as proposed. The South Carolina superintendent writes that their Board of Education has adopted resolutions similar to those by the North Carolina Legislature urging the distribution of the fund. The superintendents in Tennessee and Maryland write that they are in hearty sympathy, with the effort to have the fund distributed rather than concentrated in one great normal college.

after its completion it is believed a force of men will start to work on the proposed car lines. The stockholders are enterprising people and much will be accomplished. The company has just purchased several hundred acres of land along Smith River, which will give sufficient power to run about all the machinery, etc., in the county.

In case the line is built, it is almost a certainty that a line will be juilt; from this place to Yanceyville, Roxbore and other points in Caswell and Person counties. The rich timber resources of Caswell and Person counties. The rich timber resources of Caswell county have for some time attracted the attention of capitalists, who are anxious to gain a means to transport the lumber to some good market. The Greensboro people, it is said, are figuring on a connection with Reidsville. The numerous mills in course of construction at Spray and the heavy freight traffic along the proposed route will enable the new company to realize a handsome dividend on the investment. Next month the citizens of the county will vote on the \$500,000 bond issue for macadamized roads, and if the election is favorable, and with a car line traversing the county and other improvements. Rockingham will be one of the most progressive counties in the South.

REIDSVILLE, N. C., April 1.—One of the meat progressive towns in the State is Spray, this county. Five years ago the place was populated by only a couple of hundred inhabitants, but now that village has grown to be a town of some \$600 inhabitants. A dozen large mills are located there, and contracts are being let for several others. Fifteen or twenty enterprises have already been in corporated this year, among the latest being the International Telephone Company, capital 125,000. A gentleman from Spray to large mills will be constructed from Spray to Reidsville, Wentworth, Leaksville, Mayodan, Madison and other points.

It is known that this last charter confers very extensive privileges to operate telephone and telegraph lines, electric railways, electric light and power plant, to manufacture and deal in any kind of electric machinery and also to own and operate factories of any kind. The company is now hard at work on the new telephone exchange, which will be one of the best in the State, and immediately

is nearly 21,000,000 pounds, an increase over last year of 7,000,000 pounds. The acreage of tobacco in this section will be decreased during the coming season. The high price paid for cotton will stimulate the cultisation of cotton.

Miss Lissie Stevens and Mr. George L. Morgan were married here this morning at 7:30. The ceremony was performed by Rew. A. P. Typer, of the Methodist Church. The young couple left on the early train for an extended trip north.

Nightly meetings are now being conincled at the Methodist Institution for Christian Work, and unusual interest is being manifested. Rev. George H. Wiley, superintendent, is conducting the services, and, as usual, is meeting with success and many signs of encouragement. Men who have not for years visited a church are attending and asking an interest in the minister's prayers. Mr. Whoy said yesterday the institution never had such a fine winter's work as that which has just past. The Bundays have been favorable to him also. Those very days which people ordinarily complain of, the cold and rainy ones, are those that give him the best chance. The tramps are driven to the institution for shelver and warmth, and is gives them that and the gospel, too. Even a rainy sunday has its uses. Men who have not for years visited a

Moreover, according to the report of this same committee, the charges of Dr. Crawford were not groundless, while Senator Bryant himself frankly declares his confidence in Judge Mann and further declares that he meant no reflection on Judge Mann's integrity.

"The attack on Dr. Crawford was only one of a series of offenses charged against Judge Campbell and sustained by the committee while Judge Mann has a clean and enviable record in his private and public life.

Fruit is Uninjured.

(Special to The Times-Dispatch.)

MANTEG, VA., April 1—Last week, following the previous one of rain, found the farmers of this vicinity with but little spring plowing done; but, however, the week was profitably spent in gotting the last tobacco marketed and in fixing plant-bads, where it had not already been done. The prices received for tobacco this year have been so unremunerative that many growers will decrease their acreage, and some are inclined not to grow it at all. Wheat throughout this spetter is a spendid condition, in spite of the fact that we have had but little snow, and a good crop is expected.

Much of the fruit is in blossom, but the severe hall Sunday hight and cold weather have not injured it. Several of our farmers have soften outs sowed, and clover also, and one progressive one has planted corn, reasoning that by the time it comes up warm weather will be established, and that the crop will have the advantage of an early start.

Grip has been prevalent here, in some instances whole families suffering with it, but happily so far no fatalities have resulted.

Pasturage this spring will be good, owing to the favorable weather, and already many cattle are showing sleek sides, in evidence of its quality.
